RESTRICTION INTO GROUPS

1. Restriction to one of the following inventions is required under 35 USC 121:

I. Claims 1-23, 27-33, 56-65, and 68-77, drawn to peptide sequences and uses thereof wherein the sequence comprises P-Y-X-L wherein X is Gly or Asp, classified in class 424, subclass 1.69.

II. Claims 1-23, 27-33, 56-65, and 68-77, drawn to peptide sequences and uses thereof wherein the sequence comprises C-D-Y-Y-G-T-C-X₁₀, classified in class 424, subclass 1.69.

III. Claims 1-23, 27-33, 56-65, and 68-77, drawn to peptide sequences and uses thereof wherein the sequences are not encompassed by Groups I and II above.

Note: Claims appearing in more than one group will only be examined to the extent that they read on the elected invention.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP 806.04, MPEP 808.01). In the instant case, the different inventions involve patentably distinct peptide sequences which neither anticipate nor render obvious one another.

Art Unit: 1618

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

ELECTION OF SPECIES

4. Claims 1-23, 27-33, 56-65, and 68-77 are generic to a plurality of disclosed patentably distinct species comprising peptides having a N-terminal amine functional group with a linker-subunit moiety which forms a modified peptide having a C-terminal amine functional group wherein the linker-subunits may be any of those of claim 3 or 4 and the precursor chelate moiety may be any of those from claims 9, 11, 12, 13, or 14. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Applicant is respectfully requested to elect a single disclose peptide sequence from within the elected group above for search purposes.

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was not made to request an oral election to the above restriction requirement due to the complexity of the restriction requirement.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (571) 272-0617. The examiner can normally be reached on Mon.-Fri., 6:45 a.m. - 3:15 p.m..
